## Revit Building Certificate Course

Purpose-built for building information modeling (BIM), Revit Building mirrors the real world of architecture by letting you work on buildings holistically, rather than in terms of separate floor plans, sections, and elevations.

With Autodesk Revit Building, you get back to what you love: designing buildings without your software getting in the way. Work in any view that makes sense, maintain the ability to design throughout different design phases, and quickly and easily make changes to major design elements. Create comprehensive design proposals in record time. See your ideas realized on the fly with 3D views and instant shadows. You can even make late-stage changes without worrying about coordinating your plans, schedules, and construction documents.

---

### WHAT WILL I LEARN?

---

The courses are hands-on, tutor-led, result-oriented and cover the Revit Architecture program to a User level of proficiency.

At the end of the course you should know:

- The Revit Interface
- Modeling
- Material Editing and Application
- Lighting Techniques
- Animation

During the course students will design an interior space with furniture, produce textures for scene and create an animated fly through.

---

### WHAT BACKGROUND SHOULD I HAVE?

---

Students must:

- be windows literate and know how to use a mouse
- have enthusiasm for design and technology

---

### IS THIS A PRACTICAL HANDS-ON COURSE?

---

There are never more than six students on a Course and each has the exclusive use of the computer equipment for the duration of the Course.

---

### ARE THERE TAKE-HOME COURSE NOTES?

---

Comprehensive Course notes are provided, together with information about graphic software.

---

### DO I GET A CERTIFICATE?

---

INSCAPE is highly respected throughout the design industry and the Inscape Certificate is an assurance of a high level of proficiency.
